

THE IRON MAIDENS - WORLD'S ONLY FEMALE TRIBUTE TO IRON MAIDEN

DRZ RECORDS

METAL TO INFINITY

Through the years, we had to deal with numerous tributes to Iron Maiden but there's none like the ones we're talking about right now. The only band with a female singer who played a decent Maiden cover song was Debbie DeMauro, the amazing voice of the almighty eighties Thrash Metal band Sentinel Beast. Their debut and unfortunately only album ever released was entitled "Depths Of Death" including the Iron Maiden cover "Phantom Of The Opera". Such great song / album...unforgettable!

But, the ones we have here and nowhauling us all from Southern California, contains five female members and blows you away if you stand strong on your feet. Linda "Nikki McBURrain Mc Donald" (drums), Sara "MiniMurray" Marsh (guitar) and Josephine "Adrienne Smith" Draven (guitar) are well known musicians and members of the US band Phantom (remember some of their awesome releases like: "Build To Perform" or "Phantom Blue"). Aja "Bruce Lee Chickinson" Kim stands proud and strong behind the mike and on bass we have Wanda "Steph Harris" Ortiz.

This is definitely one of the best Iron Maiden tributes I've ever heard. The female (fantastic) frontcover artwork of a female monster is done by the master himself named Derek Riggs, the man who did the creation of Iron Maiden's Eddie you know. Well, all is totally Maiden minded! Check out their nicknames and they even used the original Iron

Maiden / Steve Harris amps and cabs to record this CD. Just to achieve the authentic sound of the masters themselves in the best possible ways. Production is very good, especially when the guitar riffs and outstanding leads starts to scream. Turn on the volume before you will drop this amazing CD into your player. All the early Iron Maiden classic ones will explode your speakers.

Ten songs plus a LIVE hidden bonus song called "Remember Tomorrow is what you can get. If you like Iron Maiden and wanna hear back some early greats in another version, played by a gang of five dedicated, female musicians...this is what you looking for. Just let me give you the entire track listing and let yourself go without limitations. Crank it up and enjoy your heart out with such nice sounding, Tribute To The Gods "Iron Maiden".

It's a bit unusual to me giving you the full track listing but this entire CD has taking me by the throat due to so many great songs relived and played in a perfect way and with an eye for details. Best Maiden tribute ever released, at least that's my opinion!!!
